WORK EXPERIENCE

Helpy_Moto

QA INTERN

- Performed E2E Testing of APIs using Postman
- Gathered Functional Specifications and created Test Plans using Agile
- Created Test Cases, Scheduled and Executed Test Integrations

PROJECTS

♦ ToDo List App

- Currently developing a to-do list app using React.Js, CSS, and JavaScript.
- Stores the Data entered by user as tasks, forming a comprehensive list.
- Enables users to delete completed tasks from the list.

♦ Weathering - A weather forecasting App

- Developed a weather forecasting project using HTML, CSS, JavaScript, GSAP, and a Weather API.
- Provides current and seven-day weather forecast.
- Enables Users to access weather information based on their location or by searching for any location.
- Dynamically changes the background to reflect the current weather condition of the selected location.
